Claims 7-15 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 9, 2005.

Claim 2 is objected to because of the following informalities: the meaning in this instance of "caulked" is unclear. The same is true in the specification. Appropriate correction is required.

The drawings are objected to because Figures 2a and 2b should be relabeled as Figures 3a and 3b, respectively. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landi 4647125 in view of Roberts 6447305.

Landi substantially discloses the claimed invention including aligned flexible cables 82,84, base piece 74, spring elements 90 and mating piece 72. Landi, however, does not disclose complementary depressions and reliefs. Roberts discloses reliefs 26,32 and complementary depressions (such as 36), and to provide Landi with same thus would have been obvious, to provide strain relief for the cables.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Landi in view of Roberts as applied to claim 1 above, and further in view of Puerner 5007856.

Landi as modified by Roberts substantially discloses the claimed invention except for catches. Puerner discloses catches 20, and to provide the base piece of Landi with catches thus would have been obvious, to better secure it to the mating piece.

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches the spring element as being a number of steel springs.

The other references cited on Form 892 disclose similar cable connectors.
